

Section 6 Activities:

ACTIVITY 1: Class Discussion (NO CODE) -

Define something from your day-to-day that you can use an algorithm to solve

ACTIVITY 2: Class Activity (NO CODE) -

When do algorithms not work? We are going to come up with a set of movement actions that a fellow-classmate will perform

ACTIVITY 3: Class Activity (NO CODE) -

Solving a Rubix Cube

ACTIVITY 4: See it - Review FindMax Code

ACTIVITY 5: Understand it - Review CalculateAverage Code

ACTIVITY 6: Do it - Write CalculateFactorial Code

ACTIVITY 7: What are some other things that we could write algorithms for?

Lets just think about different problems that we've seen in Math
